

# InstaFrost

COMMERCIAL | RESIDENTIAL

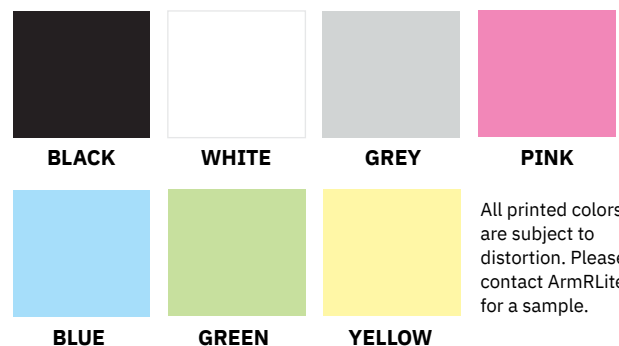

ELECTRA™ MODEL  
PHOTO AND INSTALLATION BY  
REGGIO GARAGE DOOR COMPANY, NY

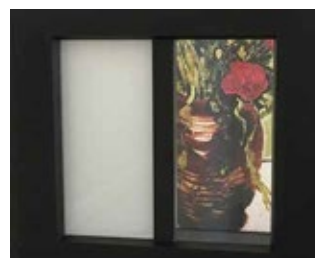

*InstaFrost offers privacy by instantly changing clear glass to frosted glass with the click of a button.*

InstaFrost glass units are available on any of ArmRLite's aluminum and glass model garage doors with the ability to customize each glass pane to include InstaFrost or keep the glass unit clear. This option cannot be retrofitted into existing overhead doors and must be manufactured into a new overhead door. InstaFrost is available in frosted shades of white, black, gray, blue, green, yellow and pink. Since 1958, ArmRLite has been consistently manufacturing glass garage doors and has never compromised on the quality of our doors. Because of this, ArmRLite is able to produce replacement sections for any of our welded models, regardless of purchase date.

- On Demand Glass Frost
- Available in Seven Different Colors
- Creates Privacy in Seconds

All printed colors are subject to distortion. Please contact ArmRLite for a sample.
