

Sloping Bottom Rail

COMMERCIAL | RESIDENTIAL

SAUSALITO FIRE DEPARTMENT, CA
PHOTO AND INSTALLATION BY NORTH BAY OVERHEAD DOORS

Sloping Bottom Rails make garage door installations on uneven floors possible without sacrificing quality.

Many garage door manufacturers and installers in our industry adhere to the old belief that sectional doors can not be installed on uneven floors. Where in the past a sloped floor would bring a garage door installation to a screeching halt, ArmRLite has developed a custom sloped bottom section rail for our welded aluminum garage door models. The sloping bottom rail does not negatively affect the warranty or structural integrity of our welded aluminum models, ensuring our doors will operate admirably for decades.

- 20-Year Welded Frame Warranty*
- Lifetime Residential Warranty*

*Except the top section when trolley operated.

Models Available with Sloping Bottom option:

- Titan™
- Electra™
- Custom C.I.™
- AluminArc
- Malibu
- Monarch
- Welded Aluminum Carriage
