When a tornado destroyed the tent covering our original event space, Arrington Vineyards turned to ArmRLite Overhead Doors to enclose our new on-site wedding and party venue with customized roll-up overhead doors and pass-through doors. We could not be more pleased with the result. The ArmRLite overhead roll-up doors truly are an invaluable asset for us at Arrington Vineyards. Not only do they provide protection from inclement weather, but they also allow us to generate increased revenue by extending the season during which we can rent out our wedding and party facility, providing us with more significant ROI on our property.

ArmRLite's overhead doors have been a great addition to our event venue at Arrington Vineyards, providing us with an aesthetically pleasing, practical and secure solution. With their luxurious design, the overhead doors have contributed to the ongoing success and popularity of our wedding and party space. When closed, the glass and aluminum doors flood the event space with natural light, giving the impression of an open-air environment. The pass door within the rollup door allows guests to enter and exit through the ADA-compliant egress during inclement weather without raising the overhead door and letting the elements in and the warm or cool conditioned air out.

In summary, ArmRLite roll-up overhead doors and pass-through door have been and invaluable addition to our business at Arrington Vineyards. We highly recommend them to anyone looking for an ADA-compliant, aesthetically pleasing solution for their space. They provide us with peace of mind that our guests are safe and comfortable while enjoying their experience at our venue.
