

Arm-R-Lite launches awning windows

In January, Arm-R-Lite announced its exclusive push-out awning windows that can be fabricated into any new Arm-R-Lite glass and aluminum garage door.

Available for commercial and residential applications, awning windows allow customers to open a window within the garage door for ventilation. The windows are easy to operate and available for both fixed and operational garage doors. Custom colors and screen options are available. www.arm-r-lite.com ■
